Underwater Pelletizing Die

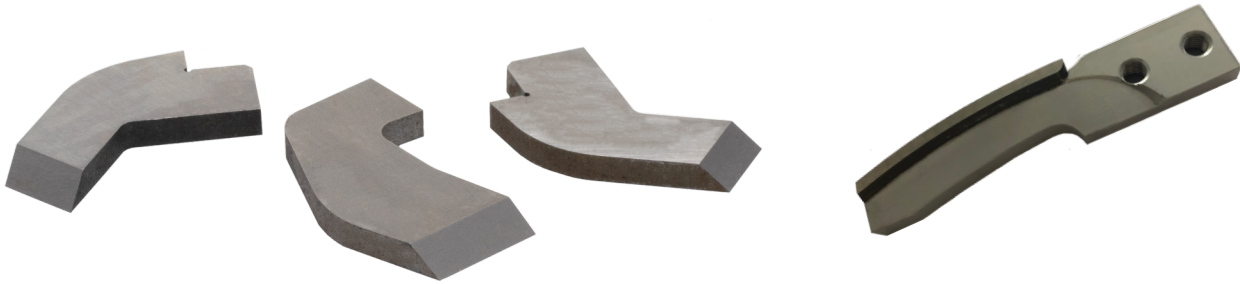

We offer underwater pelletizing dies with Tungsten Carbide inserts

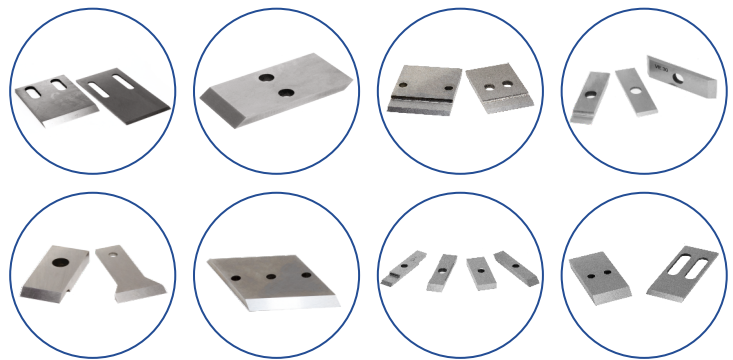

Water ring Pelletizing Die

Our Water ring Pelletizing dies are made out of D2 steel, vacuum hardened

Pelletizing Blades for Underwater and Water ring Pelletiser

- Pelletizer Blades are small but significant component of good granule production in the plastic compounding industry.
- Concord Blades deliver excellent cutting performance with long life due to its superior wear resistance.
- With our experience in cutting process and Tool Making, we manufacture blades which last longer and deliver consistent performance over the life of the blade.
- We can manufacture blades to your specific requirements..

Materials Used

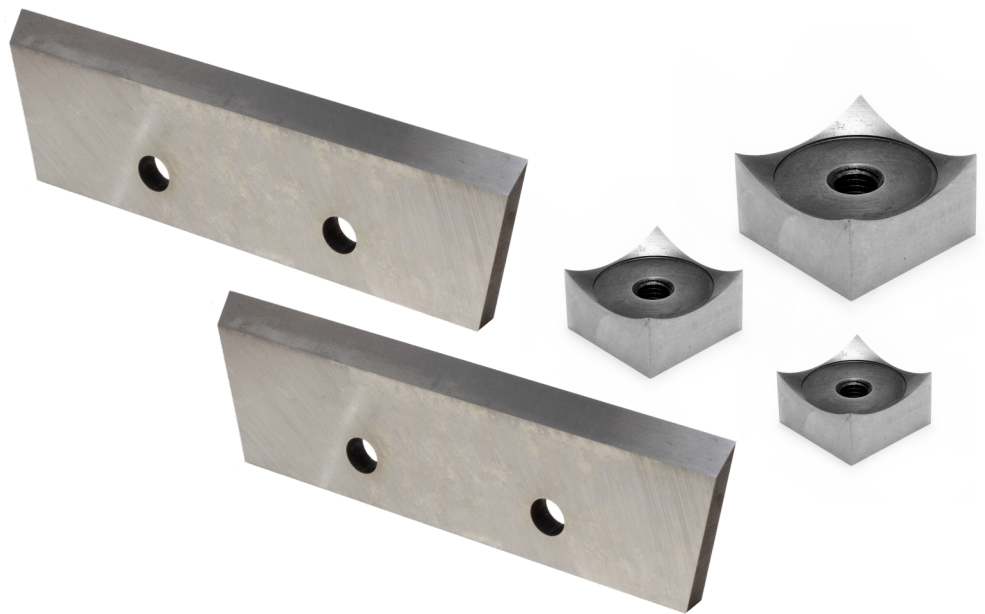

Concord uses HSS from reputed manufacturers like BOHLER Austria, Erasteel France, Edelstahl Germany.

Commonly used steels are: D2, M2, M35, & PM steels with vacuum heat treatment.

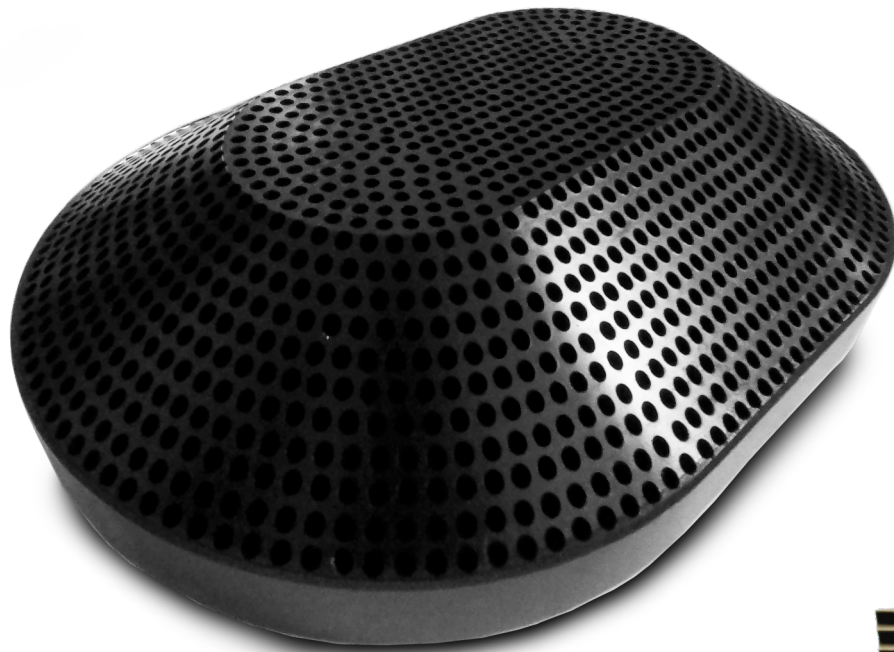

Granulator Blades

Excellent quality Granulator blades manufactured from Imported D2 material with heat treatment

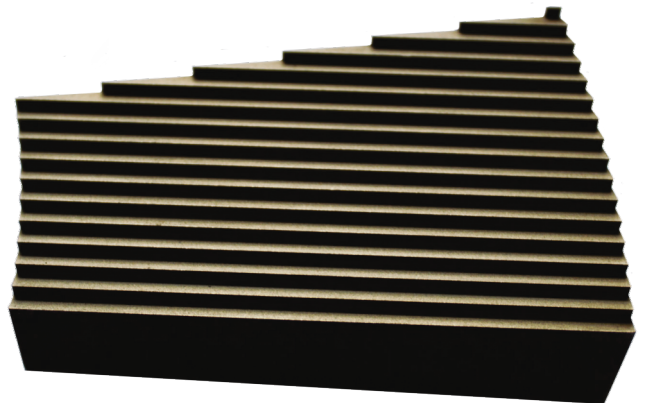

Breaker Plate

Tapped Driving Bush

Pulveriser disc segment
